RE: BREAST LIGHT

Dear Lindsay

Thank you for giving me the opportunity to use the breast light for a few days in my practice.

I used it on fifteen patients undergoing a routine examination. The patients were very impressed with seeing normal breast tissue.

I would like to use it as an addition to a normal breast palpation in my practice.

Fortunetly in the group examined nothing untoward was detected. I think that there would be many woman who would like to own one.

Thanking you

Best wishes

John Fassler
